Technical Skills

- HTML
- CSS3
- javaScript
- ES6
- TypeScript
- React.js
- Next js
- wordpress
- Docker
- CI/CD
- Git & GitHub
- Linux
- AWS
- solidity
- ether.js

Education Background

SMI University (SMIU)
2020 - August -2024

I have studied Object Oriented Programming, Calculus, Data Structures and Algorithms, and Software Development Cycles.

PIAIC
2021 - August -2023

Throughout my academic journey, I have acquired a comprehensive set of skills in various aspects of technology. In the initial quarters, I focused on Linux OS, shell scripting, and DevOps tools like Docker, Kubernetes, Git, and Github, which provided me with a solid foundation in application deployment and cloud data storage. During the second quarter, I honed my frontend and backend development skills using HTML, CSS, JavaScript, Bootstrap, and React.js, enabling me to create engaging user experiences. In the third quarter, I delved into APIs, Next.js, and databases such as MongoDB and SQL, expanding my knowledge of building robust and efficient applications. Finally, in the fourth quarter, my attention turned to cloud technologies, specifically AWS, where I learned about cloud infrastructure and deployment strategies. Overall, my studies have equipped me with a diverse skill set to excel in the ever-changing field of technology.

About Me

I am a full stack developer with a passion for creating interactive and responsive web applications. I have experience working with JavaScript, React, Next.js, MongoDB, HTML, CSS, Doker and Git. I am a quick learner and I am always looking to expand my knowledge and skill set.

WORK EXPERIENCE

Full Stack Developer at HBOX Digital
Oct 2023 - Present

As a Full Stack Developer, I play a crucial role in designing and developing innovative websites and applications for clients. With expertise in HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, ReactJS, NextJS, Node.js, MongoDB, Docker, WordPress, Builder.io, Google Site

Web Developer at ProWebandSEO
Feb 2023 - August -2023

- Developed and maintained responsive websites using HTML, CSS, JavaScript, jQuery, React.js, and WordPress.
- Collaborated with a team to create visually appealing web applications.

Web3 Projects

- Develop lottery smart contract using solidity and deploy on test network.
- Develop ERC20 Token using solidity and deploy on test network .

DevOps Projects

- Develop modular shell scripts that automate data retrieval from a web endpoint
- Dockerize and containerize the application and deploy on kubernetes.
- CI-CD of python application using github action
- CI-CD pipeline using jenkins
